

A WEB AND MOBILE RESERVATION AND QUEUEING SYSTEM
WITH REWARDS SYSTEM, LOCATION BASED RECOMMENDATION
USING GEOFENCING, AND IN-APP SERVICES

USER GUIDE

for the Web and Mobile Application

ABOUT THE PROJECT

Samgyeopsals have seemingly risen in popularity. This is due to a number of factors including the Trends in today's time, the recent boom of KPOP and Kdramas, as well as the various options of food available to us today. Korean Barbecue or Samgyeopsal is an unlimited style restaurant that offers meats such as pork, chicken or beef along with various sauces and marinades. It also includes traditional and non traditional Side dishes and some restaurants tend to fuse different cuisines together such as Japanese and Korean to entice customers and give them more options to choose from in terms of food and taste.

With the pandemic and the move towards cashless and mobile transactions. Restaurants have slowly adopted the method of contactless, cashless payments by means of their mobile phones. In order to do so an effective mobile and web application is necessary to provide key features that will help both the customer and staff/restaurant owner in providing and receiving the best service. Samquicksal would be a great help to both as it allows to ease the process and make ordering, dining in, and checking out simpler and more efficient and keep them safe as there is barely any contact between the customer and staff in terms of physical touch which is crucial to keeping safe in today's pandemic.

Through the mobile application the customer would be able to reserve and queue for a samgyeopsal restaurant, receive real time updates on the status of their queue or reservation, order within the app and request for grill changes or ask for assistance. The web application will help the staff/restaurant owner better manage their restaurant by editing the menus, pricing, time limits etc. There is also a rewards program to allow for better customer interaction between the customer and restaurants. The rewards program is based on a digital stamp card that is setup by the restaurant owner. They also decide the type of reward and tasks needed to receive 1 stamp.

Samquicksal overall would help samgyeopsal restaurants in keeping up with the innovations in technology and better the services they provide to their customers

STORE HOURS

Store Hours is where you can create a time slot for the restaurant.

Days will not be available if a time slot is already created. This is to avoid the conflict of restaurant **store hours**.

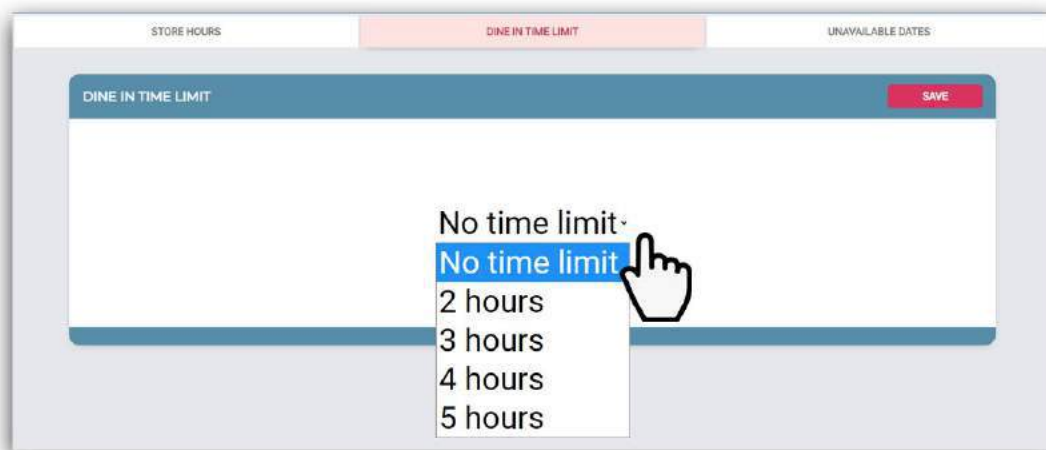

There is a default time slot where it can be edited but can not be deleted. You may add another time slot by clicking the button.

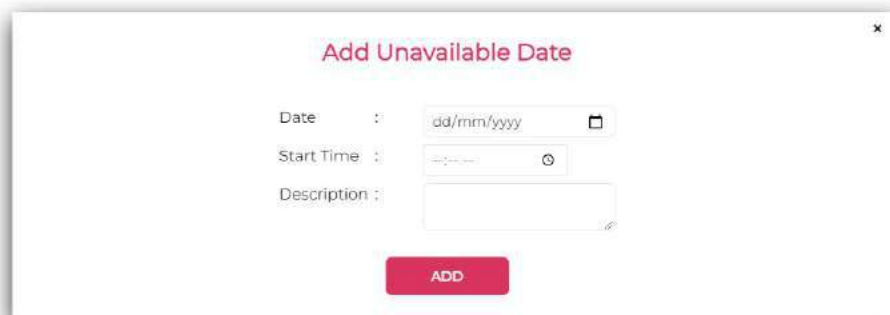

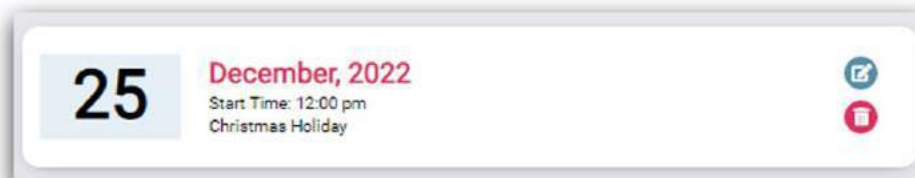

DINE IN TIME LIMIT

Dine In Time Limit is where you can set the hours on how long the customer can dine-in. This may help give you an estimated time on how long a customer may finish eating at the restaurant.

A screenshot of a web application interface for managing restaurant settings. At the top, there are three tabs: 'STORE HOURS', 'DINE IN TIME LIMIT' (which is highlighted in red), and 'UNAVAILABLE DATES'. Below the tabs is a form titled 'DINE IN TIME LIMIT' with a 'SAVE' button in the top right corner. The form contains a dropdown menu that is currently open, showing the following options: 'No time limit' (highlighted in blue), 'No time limit', '2 hours', '3 hours', '4 hours', and '5 hours'. A hand cursor icon is pointing at the 'No time limit' option.

UNAVAILABLE DATES

Dine In Time Limit is where you can set the hours on how long the customer can dine-in. This may help give you an estimated time on how long a customer may finish eating at the restaurant.

OFFENSES

Offenses are managed by adding number of offense and choosing what type of offense. Cancellations, not showing up at the restaurant and also not paying are the offenses which the restaurant is able to consider blocking a customer on queueing or reserving at their restaurant.

Approved Customers are given with a **Queue Number** depending on the time they have booked and is also based in number of priority customers such as Senior Citizen or Children.

VALIDATE AND ADMIT CUSTOMER

An approved customer will then be validated by clicking the **Validate** button. A prompt will show to validate the customer or not. This validation will give 15 minutes for the customer to arrive.

After validating the customer, No show and Admit button will appear. Admitting the customer will request for you to input the table numbers you want the customer to be placed-in.

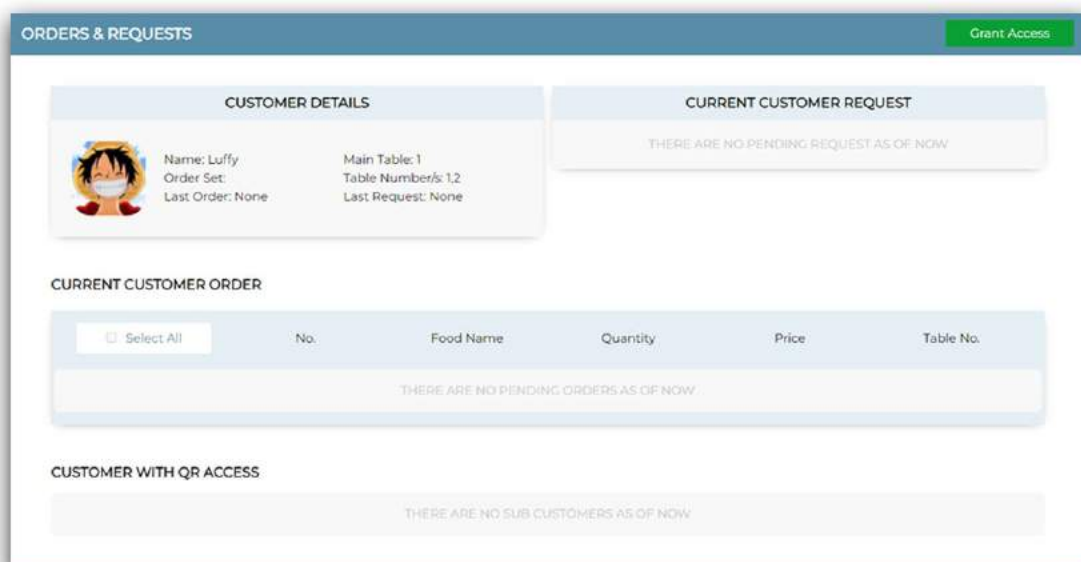

GRANT ACCESS

Once you admit the customer, it will now be moved to the **Customer Ordering**. The app will then request for you to grant the customer an access to Order.

Number of Orders, Requests, Dine-in Time and if the customer has access to the Ordering UI is show here. Pink colored indicates that a customer is already occupying the table. Clicking this will show the **Orders and Requests** of the customer and other details.

ORDERS AND REQUESTS

The timer will start once the customer is given access. Upon clicking the table number, customer **orders and requests** as well as the customer with a **QR access** will now be visible. Scanning QR is for the customers who occupy two or more tables to identify what table number requested for refills.

Mobile

CUSTOMER LOGIN

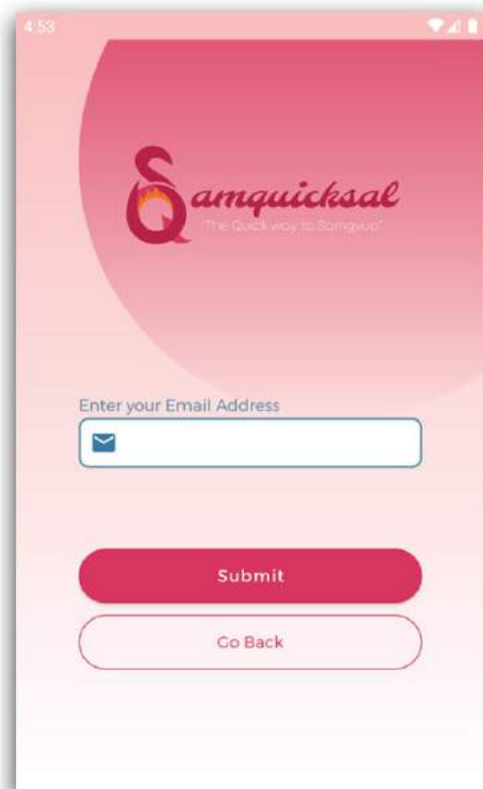

A screenshot of the mobile application's login screen. It features the Samquicksal logo at the top. Below the logo are two input fields: 'Email Address' with an envelope icon and 'Password' with a lock icon. A 'Forgot Password?' link is positioned to the right of the password field. At the bottom, there is a red 'Login' button and a link that says 'Don't have an account yet? Sign Up'.

After opening the application. You will be presented with the Login page.

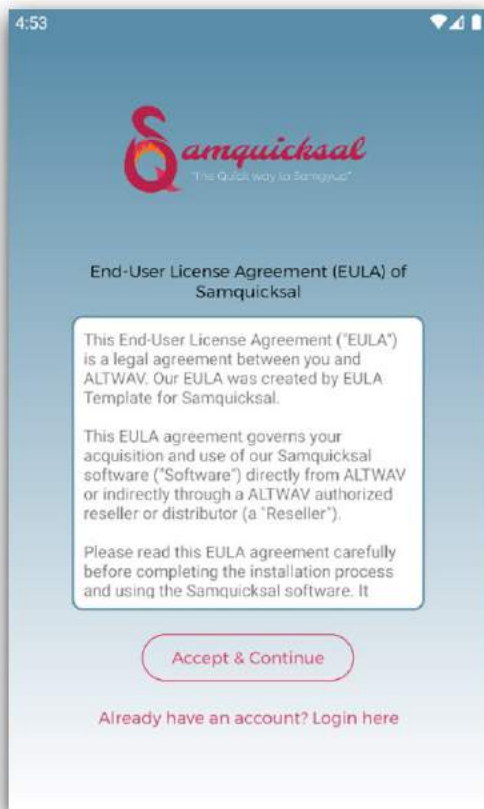

You may login with your registered credentials.

Tap “**Forgot Password?**” and enter your email address then click submit.

You may able to change your password after viewing the emailed reset password on your email.

A screenshot of the mobile application's 'Forgot Password' screen. It features the Samquicksal logo at the top. Below the logo is a single input field labeled 'Enter your Email Address' with an envelope icon. At the bottom, there are two buttons: a red 'Submit' button and a white 'Go Back' button with a red outline.

CUSTOMER REGISTRATION

End User License Agreement will be presented after tapping **Sign Up**.

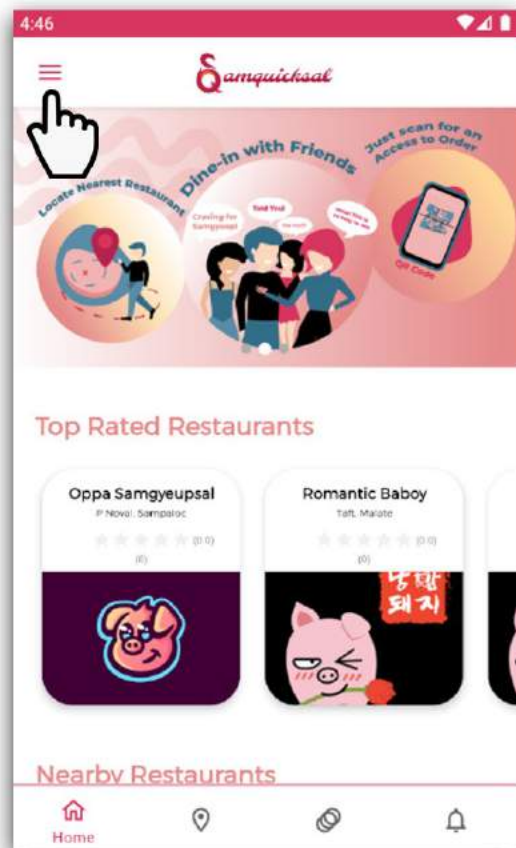

Tap **Accept & Continue** to register an account.

Enter all the information needed for you to Sign Up.

Once Sign Up is clicked, you may able to login anytime.

Homepage

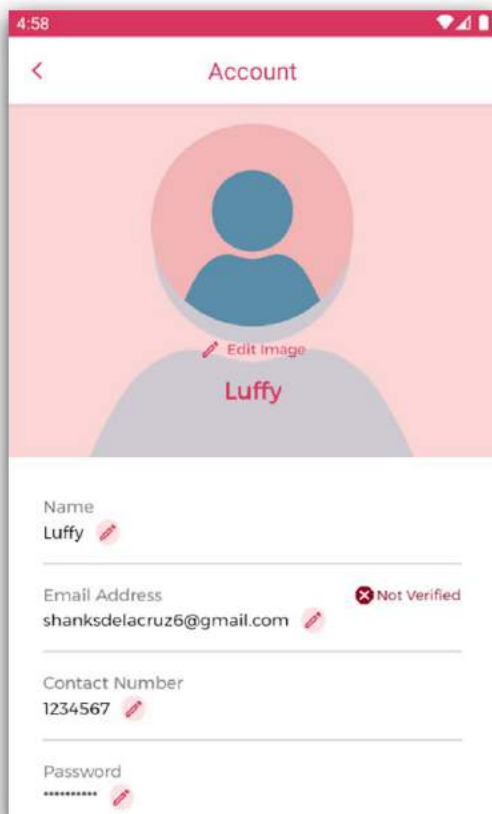

Homepage is where you can view the Top Rated Restaurants and Nearby Restaurants.

Sidebar will show once you tapped the hamburger menu on the upper left corner in the Homepage.

CUSTOMER ACCOUNT

Account is where the user can change their user information and password.

Not Verified indicates that the account is not yet verified through and will not be able to use the application to its full ability such as **Queueing** and **Reserving**.

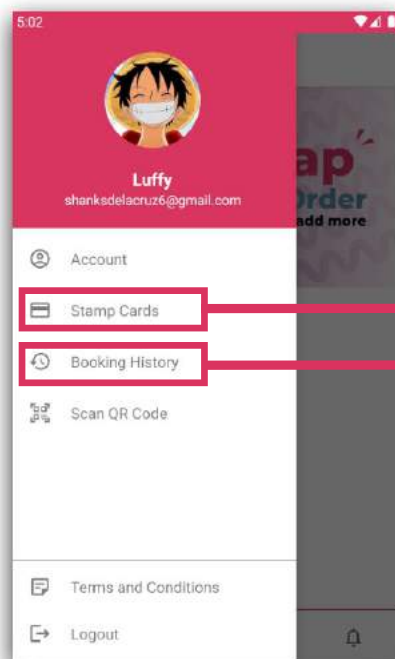

If tapped **Not Verified**, a pop up will show to confirm whether you want to verify your email or not.

An email will be sent to your registered email to verify your account in the application.

STAMP CARD & TRANSACTION HISTORY

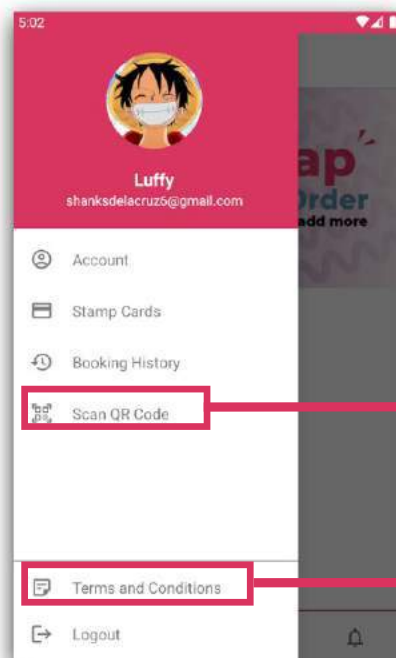

Stamp Cards is where user can get rewards from a specific samgyeopsal restaurant.

Stamp Cards is where user can get rewards from a specific samgyeopsal restaurant.

SCAN QR CODE & TERMS AND CONDITIONS

Scan QR Code is where you can get an access to ordering part if permitted.

Term & Conditions is where you can view the **End-User License Agreement** of the application.

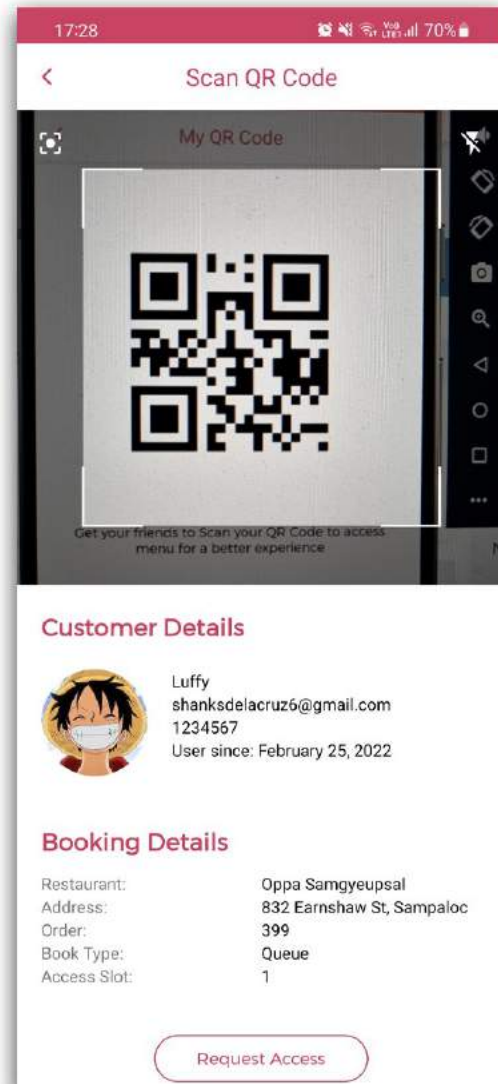

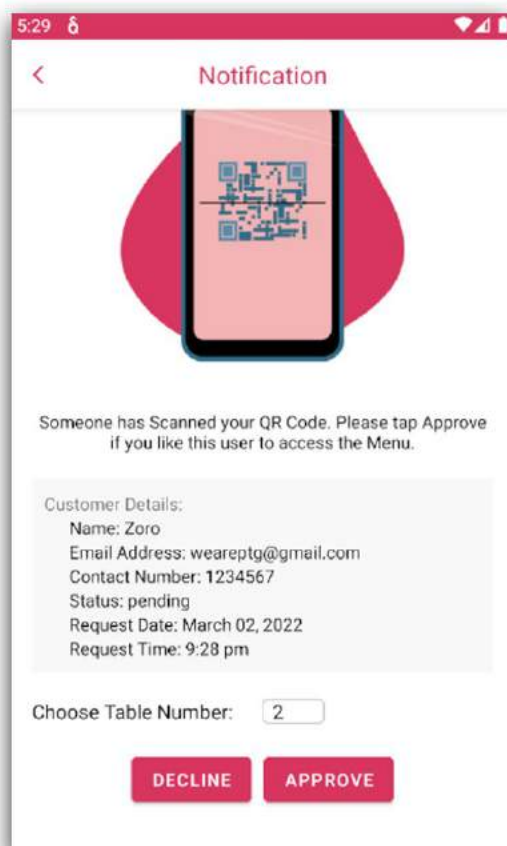

SCAN QR CODE

When a QR Code is Scanned, this is what it will look like.

Customer Details as well as their booking details are shown once you scan a QR Code.

This will help you know that you scanned the right QR Code.

Tap **Request Access** and wait for your friend to whether confirm or decline your request.

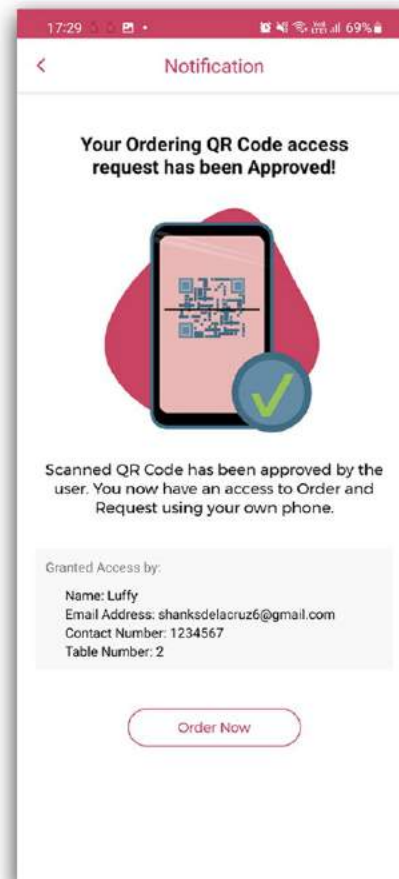

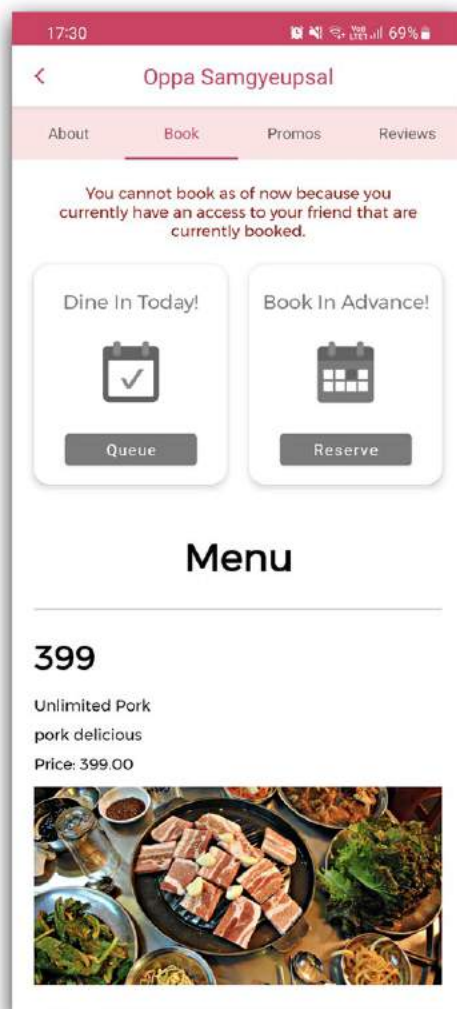

This is what it will look like to your friends phone.

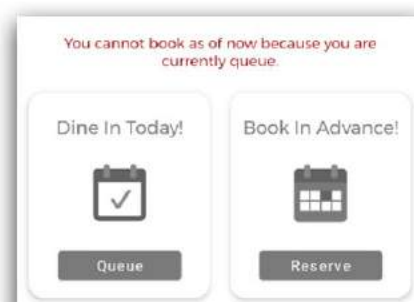

Table number can be chosen on where your friend is in.

SCAN QR CODE

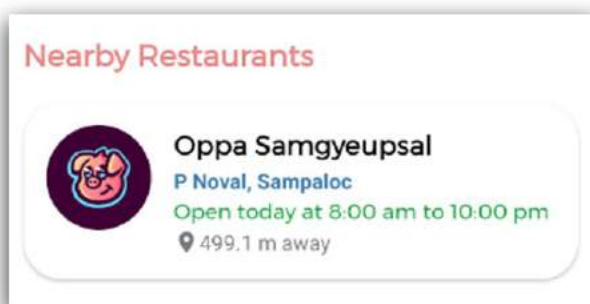

You will now be able to **Order** when a notification of approval is sent through your mobile phone by tapping the **Order Now** button.

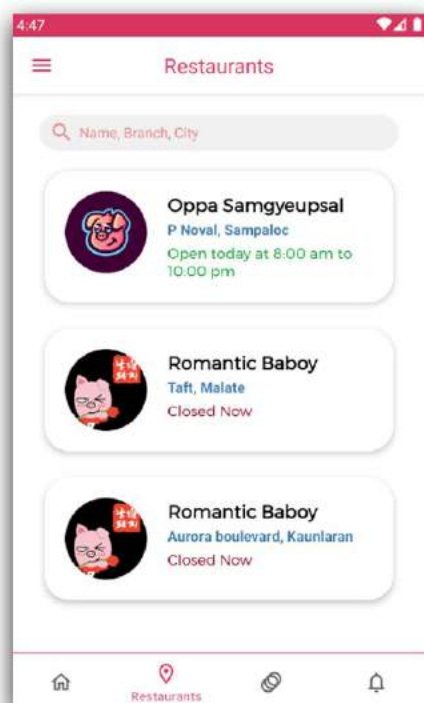

You'll no longer be able to **Queue or Reserve** since you have an ongoing transaction in the restaurant. As well as your friend who booked the queueing or reservation.

BOTTOM NAVIGATION BAR: Restaurants

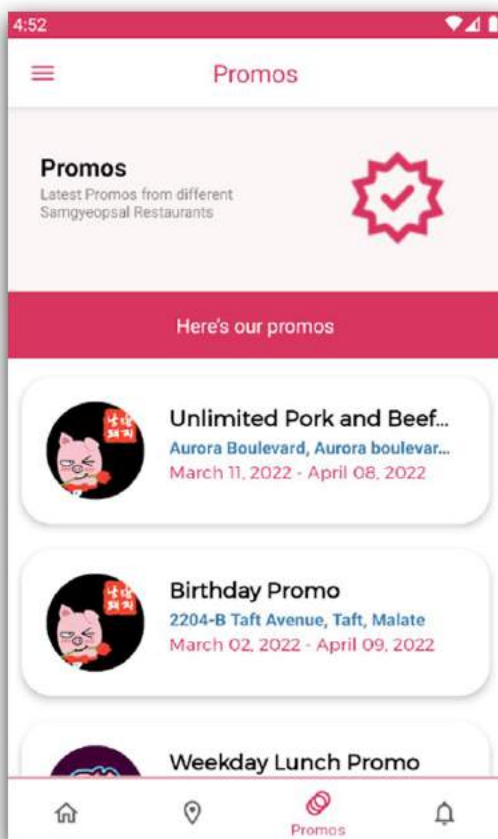

To get the **nearby restaurants** in your area, turn on the location on your mobile phone.

You can also view the listed restaurants by clicking the **Restaurants** in the bottom navigation bar.

Search bar will help you find a specific restaurant that you wantt to dine-in to.

BOTTOM NAVIGATION BAR: Promos

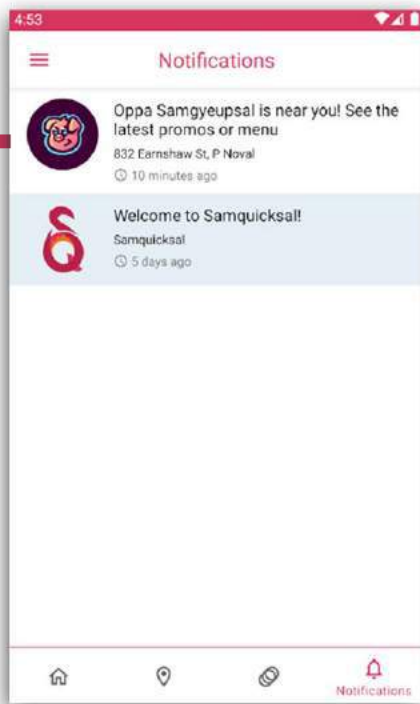

Promos is where you can view the listed promos along with their validity date.

By tapping a promo, you'll be able to see the Mechanics.

BOTTOM NAVIGATION BAR: Notifications

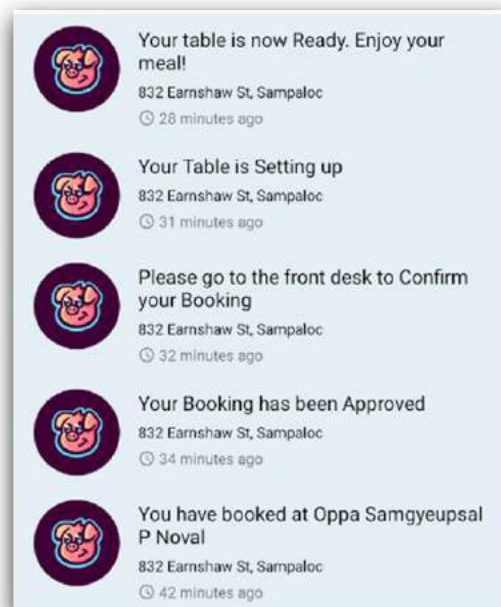

This is when a specific notification is viewed.

Promos is where you can view the listed promos along with their validity date.

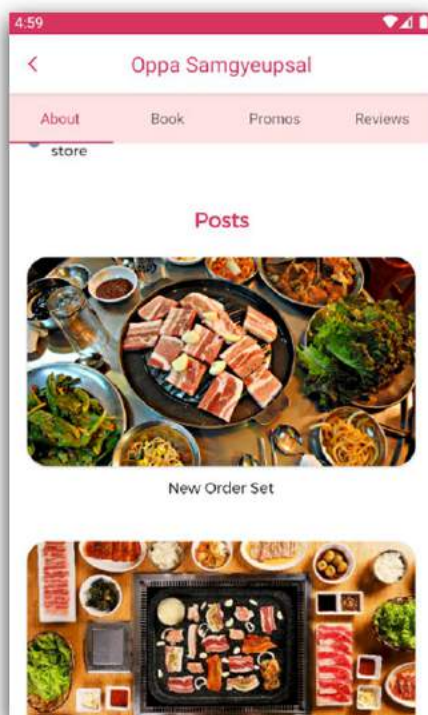

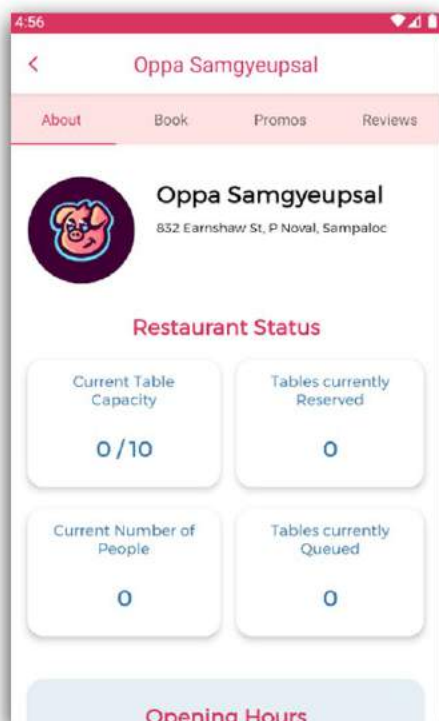

These are the **Notifications** that a customer may receive when dining in.

RESTAURANT INFORMATION: About

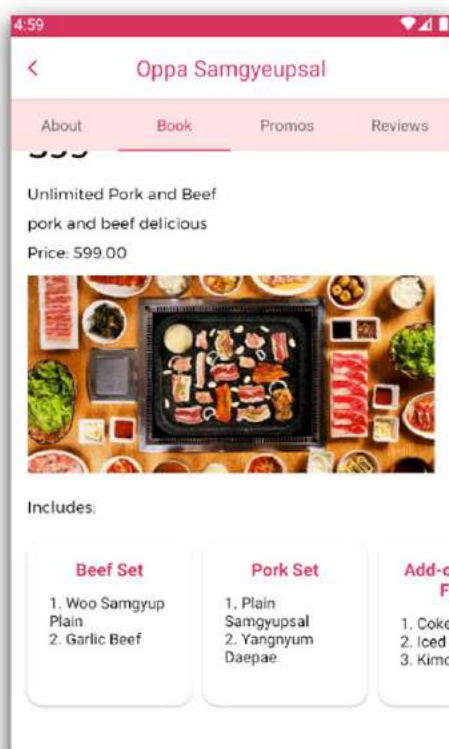

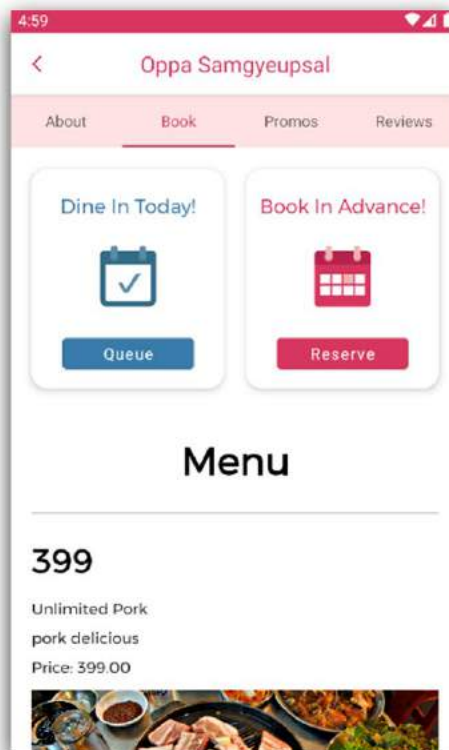

When a specific restaurant is viewed. You'll be able to see the [About](#), [Book](#), [Promos](#) and [Review](#) in the Navigation Tab.

Restaurant Status can be seen here to give you an information whether the Restaurant is full or not.

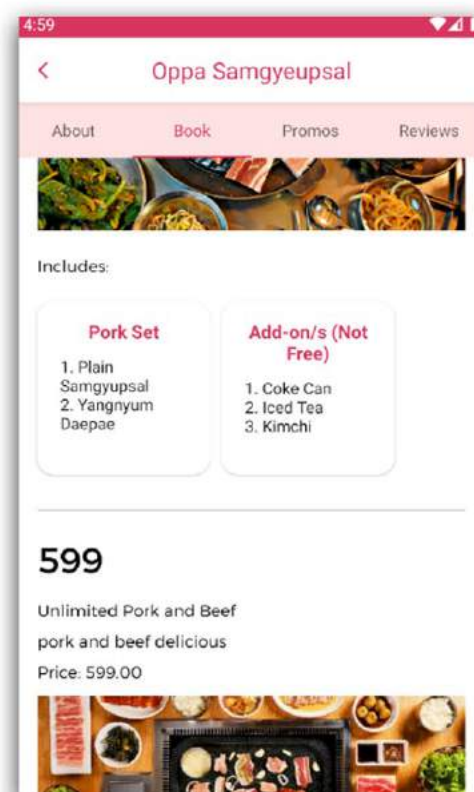

[Store Hours](#), [Restaurant Policy](#) as well as the [Posts](#) can be viewed here.

RESTAURANT INFORMATION: Book

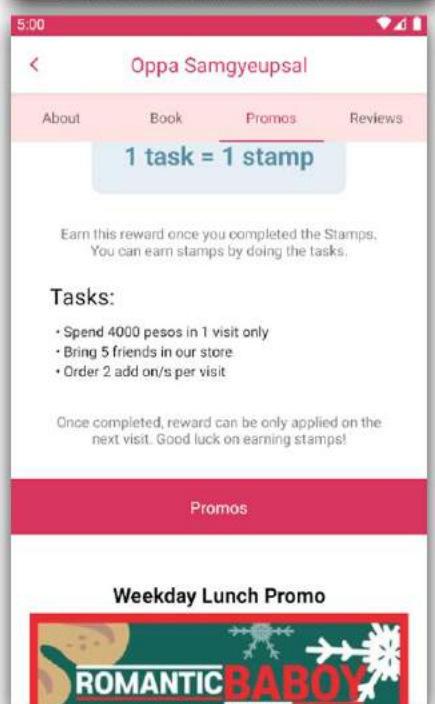

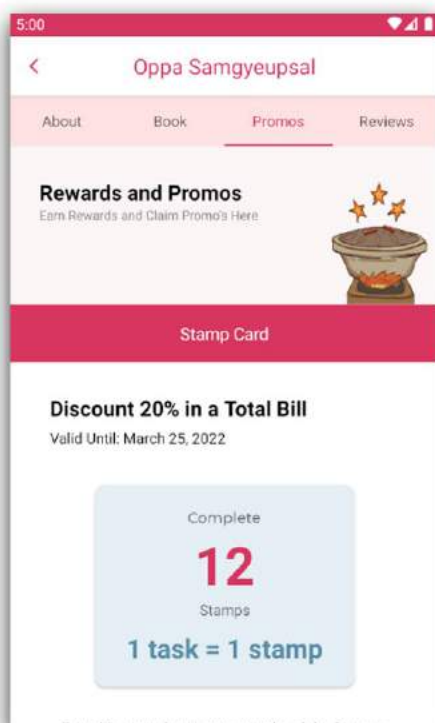

In the **Book** tab, there is an option to Queue or Reserve. **Queue** can be chosen when you want to dine in today without a reservation. To book in advance, tap the **Reserve**.

You may able to see the **Menu** in the Book tab as well. **Inclusions**, **Price**, **Description** and **Tagline** are also indicated.

RESTAURANT INFORMATION: Promos

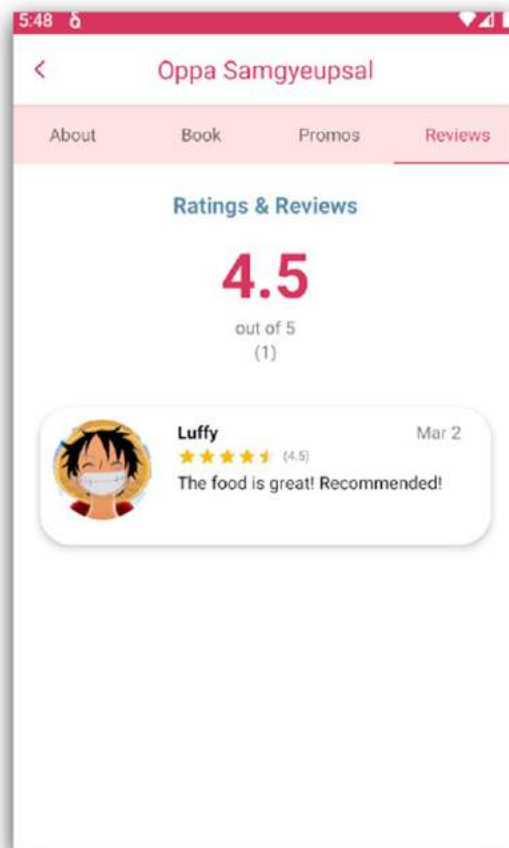

In the **Promos** tab, Information about Rewards and Promos can be seen here.

RESTAURANT INFORMATION: Promos

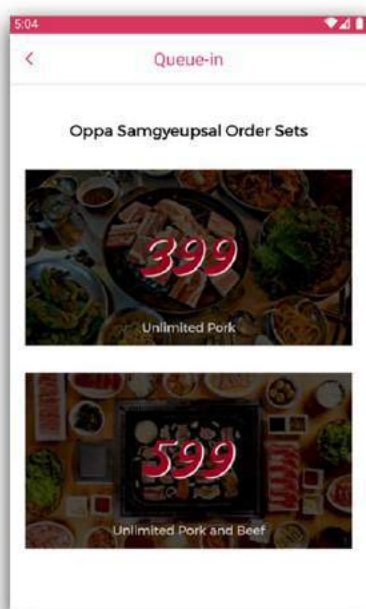

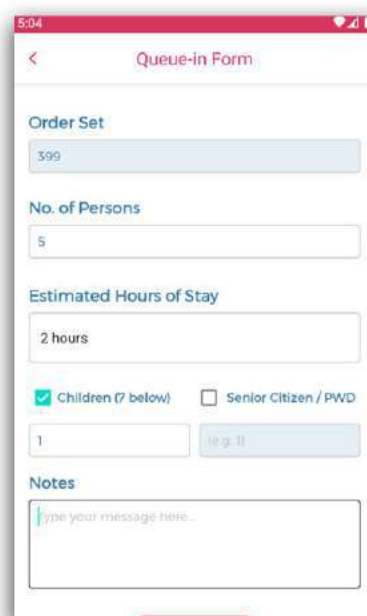

Reviews from customer who dine-in and gave a review can be seen here.

Your review can only be seen here, once you check out in the restaurant and rated and gave comments about the restaurant.

BOOKING: Queue-in

When **Queue-in** is chosen, an **order set** can be selected. If an order set is now selected, a form will show and the customer can enter the necessary information such as Number of Person, Estimated Hours of Stay, Children and Senior Citizen/PWD. Notes here is optional.

Upon submitting, the booking details will show up as well as the estimated bill.

Estimated Price:		
399	5x	1995.00 PHP
Service Fee (0%)		0.00 PHP
Incl. Tax		0.00 PHP
Discount:		
Senior Citizen (20%)	0x	0.00 PHP
Children (0%)	1x	0.00 PHP
Total Price		1995.00 PHP

Discount will only apply upon showing of PWD/ Senior Citizen Card and for Kids 7 and below, must bring birth cert or id with birth.

BOOKING: Queue-in

If booking details are already set, the customer may submit it and a status will show indicating a 15-minute timer to cancel the booking.

If the customer don't wish to cancel, **Go Back** button will be clicked.

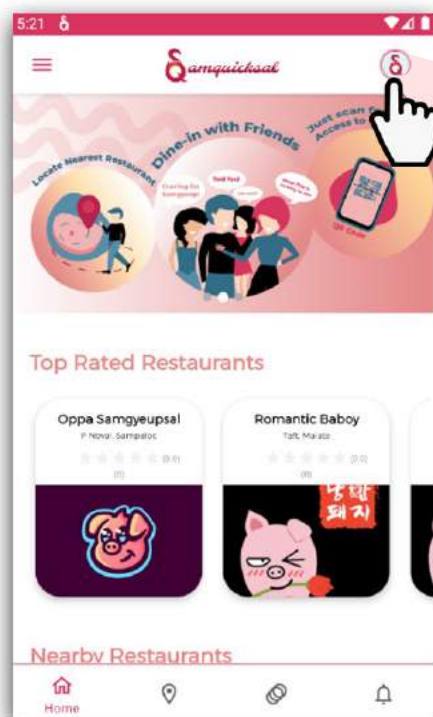

A **queue number** will then show up once the restaurant approved the booking.

A 15-minute confirmation timer will be given in order for the restaurant to validate your booking. Once you show up before 15 minutes, your status will then change.

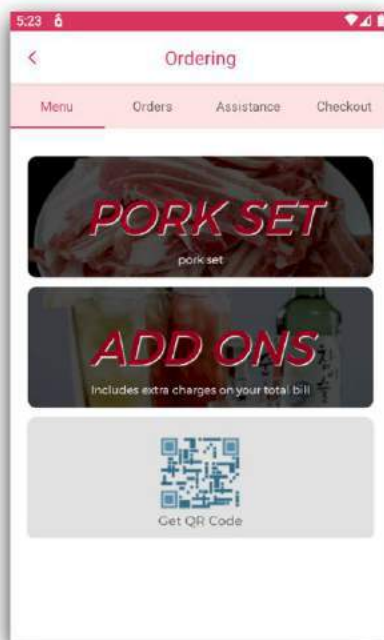

BOOKING: Queue-in

Status about your booking can be viewed here. This will also change to **Ordering UI** once the restaurant has granted you an access.

ORDERING: Menu

Once **Ordering UI** is accessible. There will be tabs that you can view such as the Menu, Orders, Assistance and Checkout.

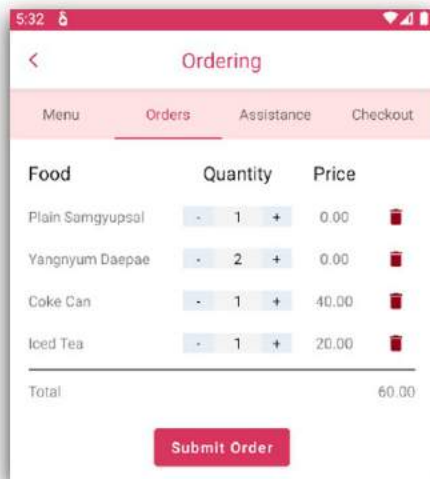

QR Code can also be viewed by the customer who booked in the restaurant and is only viewable when a single booking transaction has occupied two or more tables.

Tap on desired set and food items wil show.

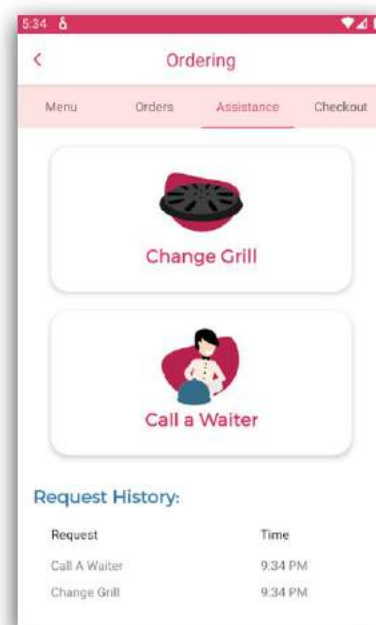

ORDERING: Ordering and Assistance

Selected orders can be viewed here in **Orders** tab where quantity and price is indicated.

Assistance tab is where you can request for a **grill change** or **call for a waiter**.

Request and **Time of Request** can be viewed here as well.

ORDERING: Checkout

Breakdown of bill can be viewed here in the **Checkout** tab.

This is to give you an idea of how much you have spent already.

Total Price is what you'll be paying for once you are done ordering.

You can select a **payment method** here in the **Checkout** tab. Instructions are also included to avoid confusion.

ORDERING: Checkout

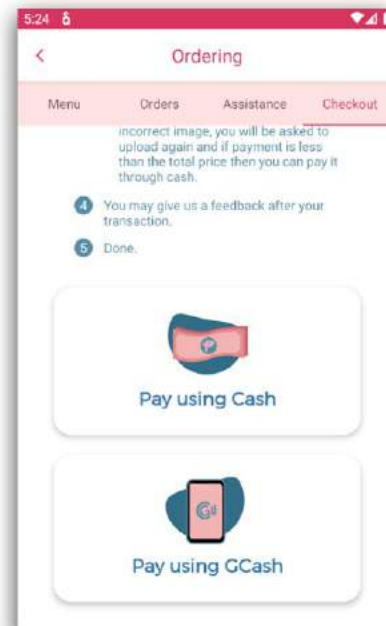

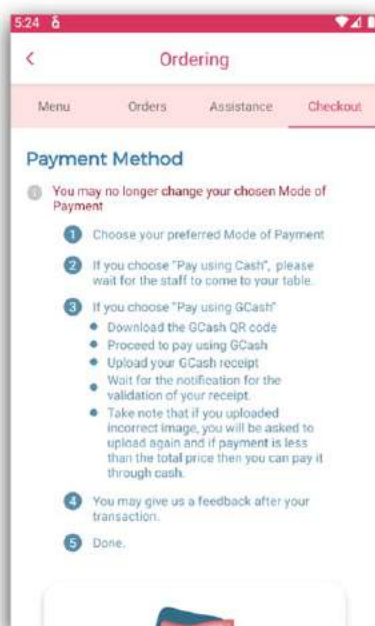

Breakdown of bill can be viewed here in the **Checkout** tab.

This is to give you an idea of how much you have spent already.

Total Price is what you'll be paying for once you are done ordering.

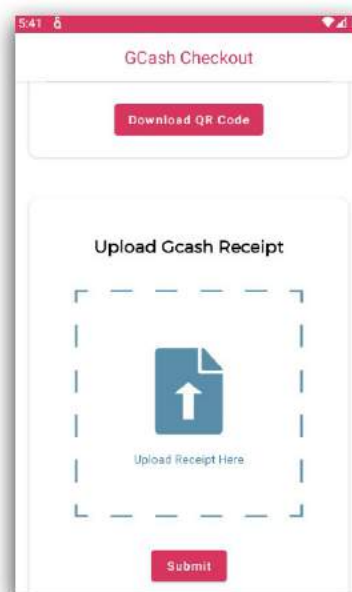

You can select a **payment method** here in the **Checkout** tab. Instructions are also included to avoid confusion.

GCASH CHECKOUT

Once you have selected **GCash** as your payment method. Total Bill will be indicated and **GCash QR Code** from the restaurant can be downloaded.

If payment is done through the GCash app, upload the receipt to provide a proof of payment.

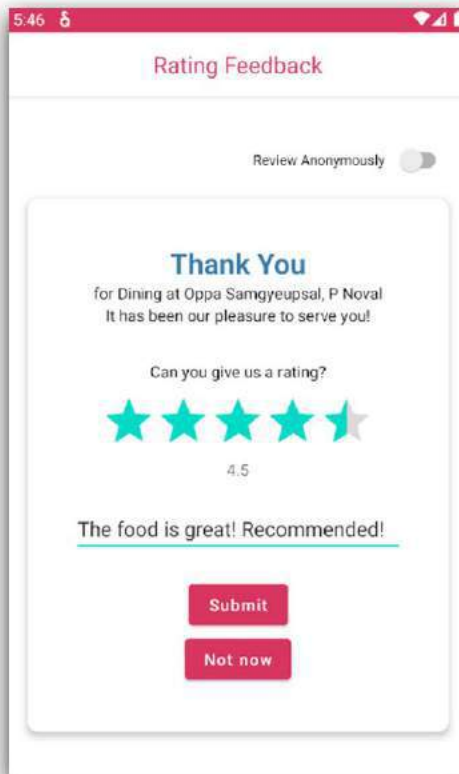

Click **Submit** button when done uploading the receipt and wait for the staff to validate your payment.

Checkout: Insufficient Payment

If incase your payment is insufficient, a waiter will collect the remaining payment in person. Also, if the payment method is Cash, a waiterwill attend to your request.

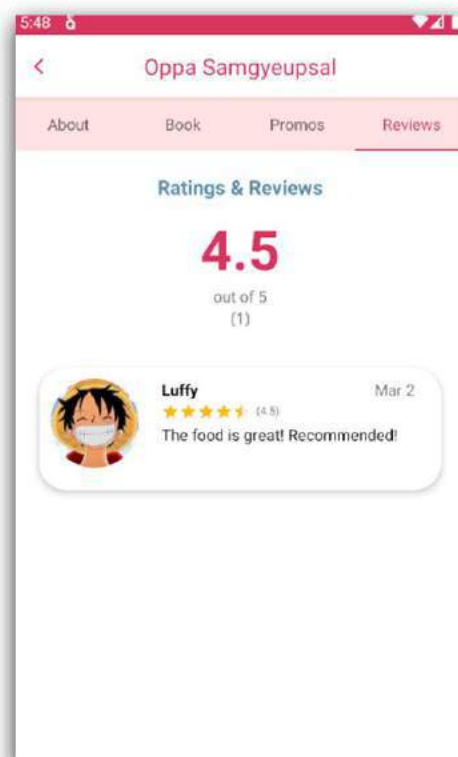

Checkout: Insufficient Payment

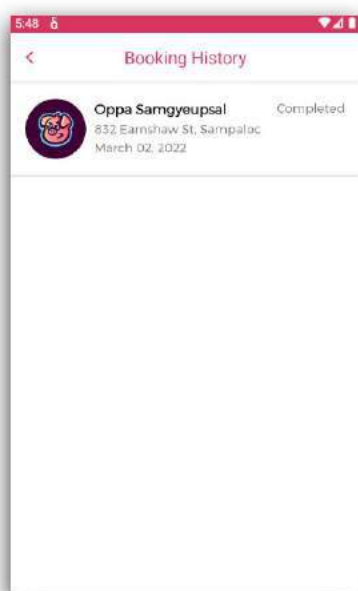

Rating Feedback is requested at the end of the transaction and is not required. You may be able to give an anonymous review by tapping the Star Rating and giving a comment or opinion then tap **Review Anonymously**.

Ratings and feedback can be viewed here in the **Reviews** tab.

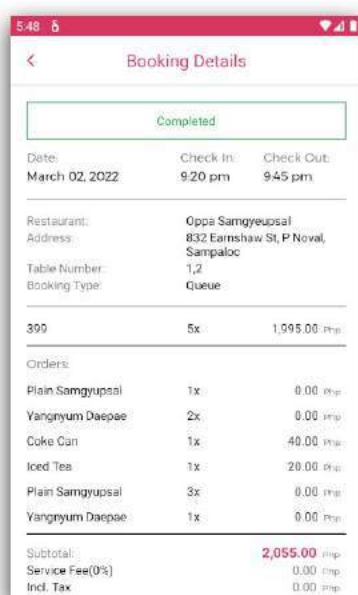

Checkout: Insufficient Payment

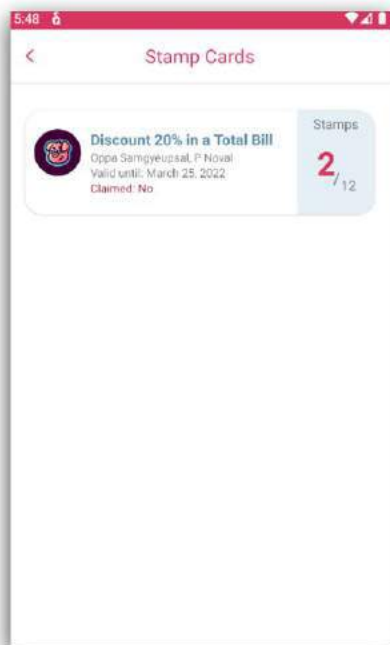

Once the transaction is done, you'll be able to view it in the **Booking History**.

By tapping it, you can view the details such as the Status which is completed, Time and Date, Address and Total Bill with the breakdown as well.
